Water and Sanitation project manager in Moldova

Solidarity Water Europe (SWE) is recruiting a project manager for the implementation of the project "Access to drinking water and sanitation for villages in the Nirnova basin” Republic of Moldova - Chisinau

Background information

Solidarity Water Europe (SWE) is a Strasbourg, France-based NGO born in 1998, following the works of the Council of Europe in the water and environmental sector. SWE’s mission is to respond to crucial water challenges that arise throughout all the countries in the European sphere with a particular focus on Central and Eastern European countries where access to water and sanitation is still an actual issue.

Solidarity Water Europe forms a common movement with the International Secretariat for Water (ISW) – based in Montreal (Canada).

The Nirnova basin project covers 30 municipalities in the Nirnova basin, 16 of which are in the Nisporeni Raion and 14 in the Hincesti Raion. The current local sanitation networks cover only a minority of the municipalities and access to drinking water is not ensured for all inhabitants of the area.

The project focuses on the general objective: “Improving the sustainable access to water and basic sanitation for the population of the Nirnova basin”. The aim here is to go beyond the mere construction of water facilities by bringing out an improved water governance model, involving all the water stakeholders at local, regional and national level. The mayors of the municipalities, the Raions, as well as the public water and sanitation operators in the two Raions (ApaCanal) are mobilized for this project.

Launched in September 2016, a first phase of the project was dedicated to carrying out a technical and institutional diagnosis of the territory of action and to setting up a Franco-Moldovan platform for exchanges between elected officials.

In 2018, and based on the conclusions of the technical and institutional assessment, the second phase of the project was launched, with the objective to:

- Implement infrastructures improving access to safe water and sanitation, identified according to the technical diagnosis of the territory. These actions include:
  - Implementation of protective measures for drinking water catchment points in the Hincesti and Nisporeni Raions (protection of 16 drinking water abstraction points);
  - Establishment of a controlled water consumption project in the village of Cateleni;
  - Establishment of a reed plant filtering plant in the village of Nemteni.
- Include infrastructure development in a basin-level approach – a framework that streamlines governance and directs water resource planning
- Developing a coherent water resource master plan for the basin upon project completion.

To this end, SWE and its partners wish to recruit a project manager who will ensure the development, coordination and smooth management of the project.
Responsibilities

The Project Manager will be responsible for the implementation and management of the various actions of the project and the team on site, in close consultation with SWE and the partners involved.

In this context, he/she will have to ensure:

- The programming, the implementation, the animation and the follow-up of the project activities;
- The evaluation and reporting of the actions undertaken;
- The local coordination of the project, in collaboration with the various partners and stakeholder;
- Provide technical expertise and support of the local stakeholders;
- Communication with SWE and the project partners;
- Financial, accounting and administrative follow-up of the project in relation with SWE-ISW HQ;
- Support the organization of experts' missions and internships;
- Organization of training sessions for Moldovan partners in France;
- Represent SWE and the project towards local partners, institutions, and donors.

Reporting and operational relationships

The Project Manager will work under the authority of SWE-ISW.

In addition, he/she will collaborate with local authorities and partners, including the member(s) of the local team, as well as with the elected representatives of the municipalities of the Raions de Hincesti and Nisporenii located in the Nirnova basin, the main beneficiaries of the project.

He/she will be in close contact with the political/administrative authorities, the central and decentralized services of the Moldovan State, local and international partners as well as representatives of other development projects under way in Moldova.

He/she will rely on the expertise of the French partners responsible for each cooperation axis. Follow-up telephone meetings will be held regularly with SWE HQ.

Required profile

Qualifications and experience:

- Master's degree in water and sanitation engineering / international cooperation and development / international project management or equivalent experience;
- Proven experience (minimum 5 years), in project management;
- Expertise in integrated water management, drinking water supply and sanitation issues;
- Experience in the supervision of works/rehabilitation of infrastructures related to water resources, civil and/or environmental engineering.

Required skills:

- Very good knowledge of Romanian
- Fluency in French
- Good command of English
- Project management and coordination skills
Ability to lead a large network of partners
Good knowledge of the functioning of international cooperation donors (EU, ADA, SDC, AFD, GIZ...)
